Bangalore

13 -16 Feb 2018

Trident infosol participated in 5th International Conference on Electronic Warfare conducted from 13 -16 Feb 2018 @ National Science Seminar Complex (NSSC) Indian Institute of Science (IISc), Bangalore.

At the event, Trident Infosol showcased its Electronic Warfare subsystems and solutions and The Falcon II rugged small form factor (SFF) computer system, specifically tailored for the avionic, military and rugged industrial market. The system offers the best utilization of Size, Weight and Power (SWaP) in the industry, and strictly adheres to Commercial Off the Shelf (COTS) standards in the industry.

Trident Infosol provides open architecture Commercial Off-The-Shelf (COTS) based solutions for mission computing, electronic warfare, radar and other ISR systems that are more capable, interoperable and affordable than ever before. Trident infosol offers system integration services for various signal processing applications meeting demanding requirements. Integrated systems are delivered more quickly and economically, allowing for higher productivity at the application development level.
